

Anastasiia **DEGTIAR**

FULL STACK WEB DEVELOPER

PROFILE

Curious and always eager to learn, I enjoy finding solutions and seeing things through, whether in a team or on my own. I develop with **PHP & Symfony**. I use generative AI every day as an assistant: I review and test every suggestion so I stay in control of my code.

TECHNICAL SKILLS

PHP 8 · Symfony · JavaScript · SQL / MySQL · HTML5 · CSS3 · Doctrine · MongoDB · Docker · Git · GitLab · Bootstrap · PhpStorm · Claude Code

Languages	PHP 8, JavaScript, SQL, HTML5, CSS3
Frameworks & libs	Symfony, EasyAdmin, Doctrine ORM, Twig, Bootstrap
Databases	MySQL, MongoDB
Architecture	MVC, REST API, Symfony Security & Mailer, Responsive design
Tools & testing	Git, GitLab, GitHub, Docker, PHPUnit, PHPStan, PHP-CS-Fixer, Postman, PhpStorm, VS Code
Documents & exports	PDF (FPDF, FPDI), Excel (PhpSpreadsheet), data imports
AI tools	Claude (Claude Code), ChatGPT · Daily use for coding, testing, documentation and debugging · Critical review of AI output

PROFESSIONAL EXPERIENCE

Jun 2026 – Dec 2026
FIXED-TERM

Full Stack Web Developer
CFD Technologies · Paris

- Continued development of my HR ERP: business modules, REST API, approval workflows.
- **Maintenance and new features on a large industrial ERP** (Symfony 7, legacy code) for a packaging group:
  - **PDF** (FPDF, FPDI): price quotes in French, English and German, cardboard and paper technical sheets, terms and conditions, signatures, preview before saving.
  - **Data**: Excel exports, imports of delivery notes and price grids.
  - **Back office**: new EasyAdmin CRUDs, Doctrine migrations, soft delete down to legacy SQL queries, price approval emails.
  - Bug fixes, dependency upgrades, Docker.

Dec 2025 – Jun 2026
INTERNSHIP

Full Stack Web Developer Intern
CFD Technologies · Paris

- Designed and built a custom HR ERP on my own (see Project), daily work with Git and GitLab.

PROJECT: CUSTOM ERP

Designed and built on my own an ERP for a cardboard and paper factory, still in development. Anonymised version: Tempo RH on GitHub.

- **Leave**: leave types, balance calculation, yearly renewal, requests, approval, rejection, cancellation, export.
- **Expense reports**: creation, status tracking, approval and reimbursement.
- **Timesheets**: entry by client, project and task, change history, Excel export (PhpSpreadsheet), REST API.
- **Cross-cutting**: notifications, admin and user areas, dashboards, custom colours and logo.

Symfony 8 · PHP 8.4 · EasyAdmin 4 · Doctrine ORM · Docker · Symfony Messenger

EDUCATION

Mar – Nov 2025
ONLINE

Full Stack Developer · RNCP level 5
Studi

- Front end (HTML5, CSS3, JavaScript, responsive) and back end (PHP, Symfony, MVC, MySQL, MongoDB).
- Full web applications, from mock-up to deployment (EcoRide, AdoptDog).

Jun 2025
4 WEEKS

Coding bootcamp (Piscine)
École 42 · Paris

- Intensive immersion in C and Unix shell, peer learning, weekly projects and exams.
