

Degtiar Anastasiia

JUNIOR FULL STACK WEB DEVELOPER

Profile

Junior full stack web developer, career changer, trained online and graduated in 2025. One year of practical experience with PHP and Symfony, including a six-month internship and a fixed-term contract on a custom ERP built with Symfony 8, EasyAdmin and Doctrine ORM for a paper and cardboard factory. I design business modules, REST APIs and administration back offices. I use generative AI daily (code generation and review, tests, documentation, debugging) to work faster while keeping full control of the code. I am looking for a junior web developer position in PHP / Symfony.

Ukrainian: native

French: fluent

English: fluent

Technical skills

- **Languages**: PHP 8, JavaScript, HTML5, CSS3, SQL
- **Frameworks & libraries**: Symfony, EasyAdmin, Doctrine ORM, Twig, Stimulus, Symfony UX, Bootstrap
- **Databases**: MySQL, MongoDB
- **Architecture & APIs**: REST APIs, Symfony Security, Symfony Mailer
- **Tools & testing**: Git, GitLab, GitHub, Docker, GitLab CI, PHPUnit, PHPStan, PHP-CS-Fixer, Postman, PhpStorm, VS Code
- **Methods**: MVC, REST APIs, responsive design
- **AI tools**: Claude (Claude Code), ChatGPT · daily use for coding, testing, documentation and debugging · critical review of AI output

Experience

Full Stack Web Developer (fixed-term contract)

CFD Technologies

June 2026 – December 2026

- Development and evolution of a custom ERP in PHP 8.4 and Symfony 8: back end, REST APIs, document management and communication between modules.
- Design of business modules with Doctrine ORM and EasyAdmin, from data modelling to the administration interface.
- Implementation of workflow validation logic (requests, statuses, approval).

Full Stack Web Developer Intern

CFD Technologies

December 2025 – June 2026

- Six-month back-end internship on the ERP: development, APIs, document management and communication between modules.
- Daily work with Git and GitLab.

Project: custom ERP

Designed and developed alone an ERP for a paper and cardboard factory, in ongoing development.

- **Leave management**: leave types, balance calculation, annual renewal, requests, approval, refusal, cancellation, export.
- **Expense reports**: creation, status tracking, approval and reimbursement.
- **Timesheets**: entries by client, project and task, change history, Excel export (PhpSpreadsheet), REST API.
- **Cross-cutting**: notifications, password reset, administrator and user spaces, dashboards.
- **Technical**: Symfony 8, PHP 8.4, EasyAdmin 4, Doctrine ORM and migrations, Docker, GitLab CI pipeline, Symfony Messenger.

Symfony 8 | PHP 8.4 | EasyAdmin 4 | Doctrine ORM | Docker | GitLab CI

Education

- **Full Stack Web Developer (RNCP level 5)**, Studi · March – November 2025
- **Development bootcamp (Piscine)**, École 42 · June 2025
